1200 mm HEATED PLATES

The new generation of **water heated plates** is already available. There are 3 models 1200mm long added to the wide range of Rotecna slats.

These bigger plates allow heating of the areas where a specific high comfort micro-climate is required- in **farrowing, weaning or finishing.**

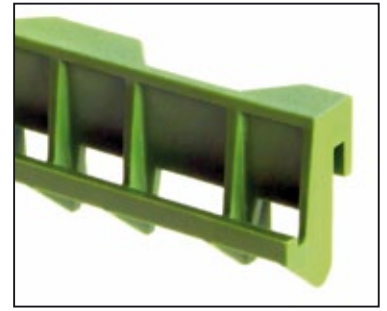

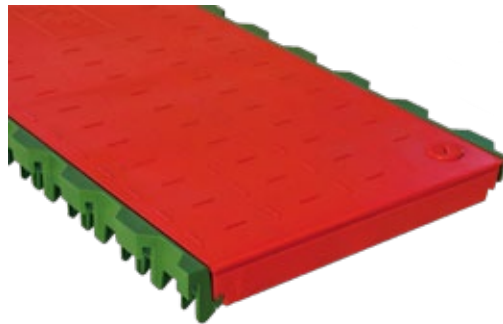

The "out-dirt" supports are easy to install. Their design makes the plate very hygienic preventing the dirt getting stocked on it. Packed in a kit of 4 units, 1 kit required per plate.

DIMENSIONS:

- 1200x400mm
- 1200x500mm
- 1200x600mm

1200mm HEATED PLATES

BENEFITS:

- Versatile design of the installation thanks to multiple sizes of the heated plates (1200x400mm, 1200x500mm and 1200x600mm) as they fit with any slat system.
- No air bubbles inside the plate thanks to its easy filling and special “non-air” closing tap.
- Excellent heat transmission thanks to the high performance of the inner stainless steel corrugated heating pipe.
- Optimal temperature distribution on the plate surface.
- Comfortable surface with a very good grip.
- Extremely efficient due to the plastic construction and isolation of the upper part of the plate.
- Simplified control system due to wide temperature and pressure range of the plate.
- Its solid structure and the “out-dirt” support make the plate very robust, hygienic and easy to clean.
- Compatible with most heating installations.
