IC Gate Valves

IC Gate valves: Innovative, with many applications.

The removal of fluid waste in the agricultural sector and foodstuffs industry has just become that much easier! Inter Continental has developed a series of extremely innovative gate valves for these applications. These high quality gate valves, manufactured from HDPE and stainless steel, are particularly suitable for use on the intensive animal farm, in food processing companies and in industry. IC gate valves are the guarantee of unequalled quality at an extremely competitive price. Moreover, all these valves are available with pneumatic operation for the total automation of your disposal system.

**OUR GATE VALVES ARE AVAILABLE IN
Ø110 TILL Ø500 MM**

**THE REMOVAL OF FLUID WASTE IN
THE AGRICULTURAL SECTOR AND
FOODSTUFFS INDUSTRY HAS JUST
BECOME THAT MUCH EASIER!**

let your business grow

Type IC-S.
 Gate valve for slurry and sludge removal.

Type IC-SL.
 Gate valve for slurry, sludge and water removal.

Type IC-SLH
 Gate valve for slurry, sludge and water removal in a stainless steel frame.

IC-S Slurryvalves

Gate valve for slurry and sludge removal

- Control by rod
- Version with single sealing ring
- Extended version standard control by separated stainless steel hook
- Gate valve can be equipped with pneumatic control.

IC-SL Watervalves

Gate valve for slurry, sludge and water removal

- Control by rod
- Version with double sealing ring
- Extended version standard control by separated stainless steel hook
- Standard equipped with a extra sealing ring at the rod on top of the valve.
- Gate valve can be equipped with a pneumatic or electric control.

IC-SLH Watervalves

Gate valve for slurry, sludge and water removal in a stainless steel frame

- Control by rod
- Version with double sealing ring
- Extended version standard control by separated stainless steel hook
- Standard equipped with a extra sealing ring at the rod on top of the valve.
- Gate valve can be equipped with a pneumatic or electric control.

IC-HP Slurryvalves

Gate valve for slurry, sludge and water removal for high pressure purposes up to 16 bar

Our IC-HP Slurryvalves are available in:

- Bras valves
- Cast iron valves
- PVC gatevalves
- SS and cast iron knife slurryvalves
- Butterfly valves

Inter Continental

Inter Continental is a Dutch company founded in 1969 and situated in Ysselsteyn.

Inter Continental is since 20 years active in manufacturing slurry- disposal and treatment systems. Our main task however is engineering low emission animal housing systems resulting in improved animal welfare, climate conditions and overall performance.

For these systems we received several environment certificates in the Netherlands (groen label), and we won the VIV Europe Gold Award.

Inter Continental offers you the best systems including professional advice for your specific requirements.
