TR2 DRY FEEDER FOR FINISHING

The new **TR-2 feeder** with two outlet, it corresponds to a new range of **dry feeders for finishing**.

With the TR2, we try to offer to the farmer a feeder to increase the range of products offered to satisfy the requirements in this productive phase and it develops most of the characteristics that have other two outlet feeders in the market.

ADVANTAGES:

- **Easy for 2 big animals at the same time.**
- **Easy adjustment even if the feeder is full (sandwich slidegate).**
- **Better durability in optimum conditions.**
- **Better feed drop.**
- **Optimising transport and mounting.**
- **Hygiene and disinfection.**

TR2 DRY FEEDER FOR FINISHING

ADVANTAGES:

• EASY FOR 2 BIG ANIMALS AT THE SAME TIME

The V-shaped design of the feeding outlets makes access more comfortable, allowing two big pigs to eat at the same time without problems.

• EASY ADJUSTMENT EVEN IF THE FEEDER IS FULL (SANDWICH SLIDEGATE)

The exclusive design of the slidegate allows the feeder to be adjusted when it is full of feed. The so-called "sandwich" system means that the shutter does not have any pressure from the feed.

• BETTER DURABILITY IN OPTIMUM CONDITIONS

Totally made of plastic (high-density polypropylene) and stainless steel, that makes the feeder very resistant to wearing out from use by the animals and corrosive and oxidising agents (feed and water) for a long time.

• BETTER FEED DROP

Its special design avoids feed accumulating and caking inside (especially mash), as well as makes the feed slide better inside.

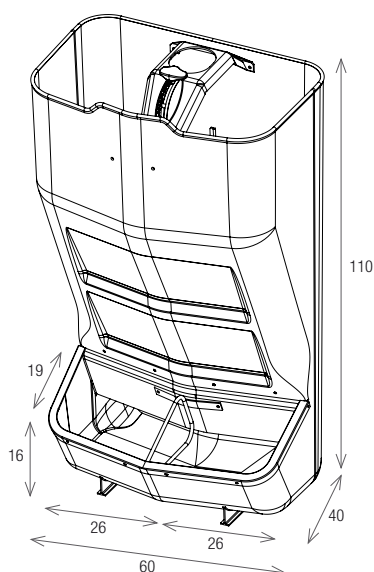

• OPTIMISING TRANSPORT AND MOUNTING

To optimise the transport space, the TR-2 is stacked and palletised.

• HYGIENE AND DISINFECTION

The absence of corners and having feet on the base of the feeder makes it easier for the farmer to clean and disinfect it.

The lack of porosity in the material maintains hygiene and guarantees better disinfection.

TR2 FEEDER FOR FINISHING

TECHNICAL DETAILS

Feed Capacity, L.	120 L.
Animal live weight, kg	18 - 120 kg
Suitable for	finishing
Feed	seco
Nº animals for feeder	20 - 22
Feeder outlets	2
Feeder height, cm	110 cm
Feeder depth, cm.	40 cm
Feeder width, cm	60 cm
Plate access, cm	16 cm
Outlet width, cm	55 cm
Weight, kg	12,5 kg
